"A man's got to believe in something. I believe I'll have another drink."

Houghton, MI

(sung to the tune of Margaritaville)

By the brothers of Alpha Phi Omega

Nibbling on pasties,
Watching the lake freeze.
All of those tourists
stuck in the snow
Playing some broomball,
Outside my dorm hall,
Looking outside and it's 20
below

Wasted away again in
Houghton Michigan
Searching for my lost
pitcher of beer
Some people claim that
there's a woman to blame
But we know, there ain't no
women here!

I don't know the reason
Why I stayed here
this season
Nothing to show but
these fingers of blue
But here are the beauties
They're the tech cuties
How they got here
we haven't a clue

Wasted away again in

Logical Logic: Female Sabotage

By Nathan "Invincible" Miller ~ Daily Bull

As I do on most days when I get bored, I resort to reading Wikipedia. Yes, I prefer to learn useless information that may come in handy someday over playing video games. Usually when I run out of being linked from one article to another, I click through the randomizer to see if I come across anything interesting. Lo and behold, I hit a jackpot. Female Sabotage.

Female Sabotage is theory to explain why the females of many species, such as the peacock, choose to mate with males that have overly excessive useless anatomy, such as large tail plumage. Sure, those male peacocks that have those six foot erections look totally hot and all, but other than that, there is no use for it. Or is there? Hm... .

What merely looks like a simple attraction to a superior mate is actually a giant conspiracy between all female peacocks, or similar species in the same predicament. [Science Content Alert] The females choose to mate with these impressively useless males because their genes are passed down to create even more useless impressive males. What is the point of this, you may ask? Let me tell you.

THE FEMALE WANTS THE MALE TO BE EATEN!!!

The truth comes out. The males are only good for making babies, and that's about it. After they're done doing the deed they might as well be dead, which is why the females are sabotaging the males' existence. The females choose those males with impressive parts because it increases their chance of being eaten or killed by Predators, many of which originate in Nashville. This way there is more food and resources for the females, since they are the only ones raising the young, as well as less chance of being eaten themselves since the lions and tigers and bears are all full.

So what does this have to do with the layman like yourself? Probably nothing. But I'd like to throw this point out there: if, as common sense shows us, humans are animals, do we follow the general guidelines of Female Sabotage?

Coming from personal experience, I'm going to go out on a limb here and say that all those ladies out there aren't trying to kill us guys. Unfortunate news indeed. You see, it dawned on me that if Female Sabotage were the case

Logical Logic...Continued...

in humans, girls should be crawling husband will probably not live for all over me. very long. It's the perfect plot.

People are at the top of the food chain, so there isn't really anything that women can sabotage on us guys, because most people aren't in any danger of being eaten by Grizzly Bears anymore. So what can they do? Well, if there is nothing that can kill us, then they could go for guys that are more likely to destroy themselves, like me for instance.

Dudes who are always on the edge and doing dangerous things, yet are still in control and not just being suicidal, are exactly what women would want under Female Sabotage. Once we eventually die in some freak accident or go down gloriously in flames, the woman will have that much more resources at her disposal, just so long as she invested in some life insurance, knowing that her

Logically, there are two possible conclusions here. One is that we are following Female Sabotage; two is that we're not; and three is that women just want us to think that we're not. Three conclusions. I'm not going to tell you that one is correct, because there may be more than one. All I've done is laid out the facts. The choice is yours. I trust you will make the right decision. ☹

Some people claim that t
here's a woman to blame
Now I think, - it won't be
any of these women here!

We ran out of twist tops,
Ran out of pop-tops
Ran out of beer, had to
cruise on back home
But there's booze in the blender
And soon it will render
That frozen concoction that
helps me hang on (Baileys!)

Yeah, and some people claim
that there's a woman to blame
And I know, that these
aren't women here!
