"Computer Science is no more about computers than astronomy is about telescopes."
~E. W. Dijkstra

Cowboys!

By John Earnest ~ Daily Bull

Let's set the record straight here – cowboys are awesome. These western cowpokes are often ignored when it comes to ultimate badass wars, most likely because the competition (pirates) doesn't have what it takes.

For starters, cowboys are American heroes. They tamed the Wild West, survived lawless lands, and paved the way for lucrative beef industries. Cowboys can sleep under the stars with little more than a thin blanket, go without food (discounting whiskey and beef jerky, naturally) for inhuman periods, kill a man in a fair fight (or if they think he's going to start a fair fight), and more likely than not bust out a guitar or harmonica and sing you a song.

Let's not ignore the fairer sex here – chicks dig cowboys. It could be the sweet hats

Students Discover New Element

By Lauren Schaefer ~ Guest Writer

It was late at night when three sleep deprived ME students stumbled upon a new element while struggling through a ME 3501 (Product Realization) project. The students – Zack Johnson, Matt Alt, and Lauren Schaefer – decided to name their new element Imaginium (pronounced im-aj-in-you-nee-um).

"Imaginium is awesome!" commented Johnson after the discovery. And he was quite right – the new element is massless, infinitely strong, and very ductile. It is magnetically attracted to humans, but the force can be negated with the use of cotton. "Imaginium is very unstable around cotton," Alt reported. "It will disintegrate if brought into direct contact with it."

The team has debated possible reasons Imaginium has not been discovered until now, and the consensus seems to be the rarity of the main ingredient – unicorns. Apparently pure Imaginium is pretty much impossible to come by, since there is only one unicorn currently in existence. "What we actually created was an Imaginium alloy that uses unicorn shit instead of the whole unicorn," Schaefer explained. "It just makes more sense, since it's a renewable resource."

Once you have the unicorn's steaming pile, combining the ingredients that make imaginium isn't overly difficult. In fact, it's possible to make a small batch in your own kitchen/kitchenette. Imaginium calls for 1 part unicorn shit, 2 parts Alumoniumismistobialolgyzm alloy 1337-ACDC42, 1/2 cup special sauce, 3/4 cup Uranium, and some steel. "If you can't find any steel, you can substitute in wood or something," added Alt.

Once the ingredients are well blended by the method of your choice, just bake (not broil) it at 3,000,000,000 degrees Celsius for 20 minutes or until the cheese browns. You should let it cool on a windowsill for at least five minutes before using. After using Imaginium, it's apparently great reheated as well. "We discovered you can pop it in the microwave like anything else. Just nuke it for 5 to 8 minutes on high and you're all set!" Schaefer commented.

There is still much to be discovered about Imaginium and its uses. "We're really excited about the possibilities," Johnson said with an excited grin. The experiments thus far suggest that Imaginium is an excellent beer refrigerant,

Snow depth is proportional to the emo population of Tech.

Ninjas!

By David Klemens ~ Daily Bull

Normally I am not the one to vouch strong as a bear. Compare this to for ninjas. That be pirate blood in Cowboys and Pirates, both of them me, yarr. This time in lieu of the newcomer, cowboys, I will defend ninjas.

First off my fellow debaters might say, "Dave, how do you know ninjas actually exist and aren't made up by some old dead guys. What proof do you have that ninjas exist, I've never seen any ninjas in real life." My response – duh, that's the point! No one has ever seen a ninja and lived to document the sighting.

A ninja is the epitome of human physique. They are nimble as a cat and

are boozing and whoring miscreants. They aren't in any prime conditioning. They rely on gimmicks and weapons to fight their fights. Ninjas are cool without weapons; their weapons take them to the next level however.

My last point: Ninjas are the coolest. Why? Teenage Mutant Ninja Turtles. It doesn't get much cooler than that. What cartoon shows have pirates and cowboys had? None that are noteworthy. Therefore, to quote Vanilla Ice, "Go Ninja, Go Ninja, GO; Go Ninja, Go ninja, GO!"

...Element from front and the three discoverers happily agreed to keep this reporter posted as new discoveries develop. 🐾

...Cowboys! from front and boots, their confident moseying swagger, or their amazing skill at rope tricks, but women are all over those dudes like chocolate syrup on a sundae. (On a side note here, saloon harlots are of notably superior quality to pirate wenches, both in terms of physical appearance and chances of being VD-free.)

When it comes to combat, cowboys have it made. Between the trusty revolver and the ever-handly lasso, a cowboy, mounted on his noble steed, can take down anything from a raging bull to a mustachioed villain in the process of lashing a fair maiden to the railroad tracks.

superiority of these hard-drinking, rough-riding, chivalrous gunslingers, I'll conclude you're completely insane. This actually works to my advantage, because it means you're more likely to follow my final piece of evidence – Chuck Norris was a cowboy. What now, fools? 🐾

If I still haven't convinced you of the
