

DAILY BULL

The Daily Bull is probably not suitable for those under age 18 and should not be taken seriously... like sinus infections!

Friday, January 23, 2009

"As you journey through life, take a minute every now and then to give a thought for the other fellow. He could be plotting something."

~Hagar the Horrible

We Didn't Fail Physics

By Liz Fujita ~ Daily Bull

With sincere apologies, once again, to Billy Joel

Albert Einstein, LHC, kinematics, gravity
Quarks with flavor, series circuits, Newton's second law

Archimedes, nanometer, moles of gas within a liter
Isothermic, isobaric, diagrams to draw

Amplitude, vector, molar mass of silver
Hooke's law, "duality", Heisenberg uncertainty

Aberration, double slit, pendulums (but no pit)
Conservation, static friction, Michelson and Morley

CHORUS:

We didn't fail physics
It was always ruling
(Newton wasn't fooling!)
We didn't fail physics
So we didn't get it
But we still won't sweat it

...see Physics! on back

The Uranus Explorer

By Tyler Botbyl & Sam Branz ~ Daily Bull

It was a calm morning for the researchers as they prepped the new addition to their team. The team allowed us access to the launch of the first ever Uranus Explorer. That's right, we are officially going to blast off to Uranus! Tension was high; the situation was a bit taut.

"We have to gently ease it into position", said head researcher Ben Dover, "Any sudden movements can cause chaos or premature detonation."

Soon after one of the lifts gave way, and the erection of the explorer was compromised. Luckily the V.I.A.G.R.A. (vertical initiation activity ground reconciliation apparatus) team was able to get it up.

While they worked on that, my co-workers I and went off to the gift shop. The T-shirts sucked but they had nice mugs, you know the ones that hold like 16 ounces and that read, "Uranus Exploration Team".

It's times like this that you are proud to be an American!

When we had finally returned to the control station to find out how the mission was going, we were surprised to know that the explorer was already closing in on Uranus. Yes, the light speed helps

quite a bit and when the bar next to the control tower is open all night and day you may lose track of time. Yet we got to hear most of the transmissions loud and clear:

"Ever since sophomore year in high school, I dreamed of Uranus," said Captain Al Pokua.

"That's great Al, we'll probe deep into space for this mission!" said first mate Shelly.

"Yeah and after getting mooned 123 times by Saturn and Jupiter it'll be nice to get to Uranus," said Al.

Well that's great that our astronauts are so enthusiastic about the mission.

"My, Uranus is large," Captain Al said.

"Great observation Al," said second mate Cathy.

"Hey, hold on guys, it's going to get a little bit hairy up here!" said Al.

"I've lost control of the joystick! It's getting away" said Shelly.

"Well, just get a firm grip and hold on to it;

...see To Infinity and Beyond! on back

And then I found five dollars.

Nathan Wonders: History

Brought to you by Nathan "Invincible" Miller

January 20, 2009: Nathan Invincible fell down a flight of stairs in his house as he left for class. He escaped uninjured, but his war with steps continues unabated.

See what I did right there? I made some history. Anybody can do it; all you gotta do is something memorable and then record it for eternity. It's

that simple. And with 500 copies of the Bull printed on paper that could potentially last thousands of years, people far into the future may someday be reading about how I routinely hurt myself on a thing called "steps." For in the future, there will only be escalators.

Why all this history talk? Obama

made history on Tuesday. How can you make history in the present if you don't live in 1984? While I might not be the nation's first black president, I can safely say that nei-

ther of us are historians. Who is to judge what is history or not? When they talk about history being made, how does they know what historians will write about? Who knows, maybe from here on out every president will be black. Then it wouldn't be special.

History depends on what you do, not what you can do. Obama can revitalize America and I can abolish stairs, but only time will tell whether we actually succeed at our monumental tasks. Go us!

The future is here.

STUDIO PIZZA

Mo' Better Pizza!

482-5100

10% STUDENT DISCOUNT!
But you gotta ask for it and show us your MFI ID—because we won't remember. Discount only on pizza and no extra discount on specials or with a coupon. And no discounts if you piss us off!

...To Infinity and Beyond! from front it may take some jerking," said Al.

"Ok, I got it now," Shelly replied. After they got the explorer back on course, they were able to start their evaluation of the planet.

"Uranus looks a little blue, Shelly. Is that normal?" asked Cathy

"Yeah that sounds about right" said Al

"Well we have to continue in to try to collect a soil sample while also trying to get rocks off of Uranus," replied Shelly

"Well let's try to get'em!" Said Al. The team tried to get their rocks off for probably 4 hours, but to no avail. Captain Al came back to space control with news that Uranus was actually too wet and thus too difficult to collect data. Due to issues beyond the team's control, they were unable to remain in space for longer than a weekend and had to return to their day jobs.

"Space control, come in space control", "hey where are you guys? At lunch?"

"No...crunch....crunch....we are busy doing stuff." Replied space control, "what do you need?"

"Permission to pull out and come on home."

"Granted"

"Ok guys we're pulling out" said the captain

As the team returned home, all I could think of is how great our talent is here. How we have no boundaries and how soon we will run out of places to try to occupy. Well for now Uranus is uninhabitable but maybe someday you to could be on the Uranus Explorer. 🍌

...Physics! from front

Marie Curie, allotropes, nodes and antinodes on ropes
Insulators, interference, radio waves

Impulse, solar car, oscillation, bell jar
One slit, two slit - how does light behave?

Feynman, volume, how to keep a flute in tune,
Gravitation, convex lens, write your data down again

Red shift, latent heat, buoyancy of my fleet
Voltage drop, charm and top, Snell's law of refraction

CHORUS

Kepler's law, parallels, Tesla coil, Bequerel
Statics, circuitry, "P V" is "n R T"

Kilograms, gamma ray, subatomic decay
Ohm, ampere, density, terminal velocity

Antimatter, black hole, string theory, magnet pole
Cathode ray, boson, atom mass of radon

DC, Pleiades, ionizing energy
Supersonic - mach four. CHARGIN' UP MAH LAZR!

CHORUS

End of earth? No-go. Stephen Hawking said so:
"Hadrons, schmadrans - read my science fiction!"

Time and space continuum, rare earth gadolinium
Phase shift, James Watt, fractals by Mandelbrot

Gold foil, Rutherford... man, I feel like a nerd.
Faraday, charge away - what else do I have to say?

CHORUS

Kelvin temps, Fahrenheit, Celcius - they work all right

Boltzmann, neutron, orbitals, proton

Doppler, Balmer, Zernike - exclude Wolfgang Pauli
Bose and Einstein condensate, quantum cat inside a crate

Radiation, pressure change, laws of motion, quarks are strange
Theta, rho. Isotope. Torr, Planck - now you know

Luminous intensity, Hydrogen spectroscopy
When's the test, and what's my score? I can't take it anymore!!! 🍌

Story of My Life

By Nathan "Invincible" Miller ~ Daily Bull

Think you've had enough? I don't.

You listen up
Here's the story, about a little guy that played too much broomball
And all day and all night he fantasized about playing that great sport
Outside on the ice
Hard his stick with the cool crazy duct tape with the flame decal
And everything is blue for him, like the ball
And everybody just left so he ain't got, nobody, to score on...

[Chorus]

Broomball, I will play 'til I die, in deep snow or sunshine, like a skater I fly, right across the slick ice, in the spring I will cry...

I play on ice but better in the snow
Even in the wind with hardly a care!
The refs went in as the snow drifts all grew
I had a girlfriend but she left me too.
Now all the people here just look around
And then they wonder, "Is this guy insane?"

Filmboard Presents:

Zak and Miri Make a Porno

Seth Rogen Elizabeth Banks

What shenanigans will Seth Rogen get into this time? You'll have to find out!

See it this Friday and Saturday in Fisher 135!
Tickets are \$3 at the door.
Showtimes: 6:00, 8:30, 11:00

I'll keep playing every day of the week
Cause I'm addicted, I'll never be free.

[Chorus]

Outside on the ice
He's still there with his own tricked out helmet and a cool jersey
And everything is blue for him, from the cold
And everybody around cause they're inside getting some, hot coco.

[Chorus]

Come see Joe Kirkish 1/29 at 7pm.

Regular hours are:
M,T,W,F: 10am to 4pm
Th: 10am with a meal at 6pm

If the lights are on, come on in!
