Identical Twins	The process of puberty
The Need to Poop	Refractory period

Oh em gee. What happened to the Bull?!

Iranian Wheel Demonstration Sparks Fears

By Nathan 'Invincible' Miller ~ Daily Bull

A DEMONSTRATION OF IRAN'S ADVANCED WHEEL TECHNOLOGY HAS SPARKED FEARS ACROSS the Western world, where many fear it could be used in future terrorist weaponry. According to expert testimony, the circular device could be used to transport goods to markets, schoolchildren in buses, or potentially deadly boulders out of mines.

The wheel, spotted last week using ultra-high resolution American spy satellites, was determined to be "nearly of the modern world's standards for roundness and rollability." With twelve equally spaced spokes, the two wheels, connected to a simple ox cart via an iron axle, hauled upwards of 500 pounds of stone, many times more than could be hauled with skids or by hand. Tensions in the Western world are understandably high.

"It's not everyday we see technology on this scale in the developing world," explains Swedish war advisor Ajax Phillips. "What would hap-

CE Major Hacks Mastering Physics, Unlocks Hard Mode

By Simon Mused ~ Daily Bull

ON THURSDAY, OCTOBER 15, 2009, what once was thought impossible was achieved. A CE major, who shall be named Steve for reasons of academic dishonesty, managed to somehow hack his way directly into the very heart of the beast named Mastering Physics.

This program has been the bane of many University Physics I students whosw A's quickly slipped thru their fingers upon the umpteenth wrong answer to Question 4 of the Chapter 12 assignment.

While sifting through files with all the pre-recorded answers to every problem he needed to solve this week, he found under the "DO NOT OPEN" folder a very mysterious plug-in setting. The .dll was surrounded by multiple unrecognizable file types whose icons appeared to look like ancient runes of a long-forgotten tongue. Once he selected the plug-in to read its properties and double-clicked the Hell-spawn icon, he soon found out that he unlocked the Mastering Physics Hard difficulty mode. Or rather ... awakened.

The problems found in hard mode were unlike anything Steve had seen before. He was being tested on concepts unknown to mankind, with free body diagrams the likes of which could not exist in our reality. The unified Theory of Every-

thing was the main topic of a mysterious Chapter $\sqrt{-1}$, whose yellow help boxes laughed at his feeble attempts at trying to get the right answer.

Wrong answers were met with insulting comments of Steve's intelligence and his mother's body mass index. The insults got so severe that the program soon included his mother in a few gravity equations, along with force equations involving the velocity of cake being "shoveled by the heap loads into her abysmal gullet."

Acceleration in the fourth dimension was being represented in such a way that his computer blue screened three times before he entered safe mode to skip the problem, only to find that his safe mode has been replaced with

“Hard mode.” His computer was immediately torn asunder by every computer virus known to PC, Macs, and some operating systems yet to be coded, where the fine particles of plastic and silicon blew away with the wind.

After cleaning up the dust that remained of his computer, he decided to stay away from his main computer and boot up his laptop. Unfortunately, he found that not only had his personal username and password become bound by Hard mode - changed to “Cockmongler” and “bonorizer,” respectively - but so had accounts all over campus.

The effects have been disastrous and disheartening. “I was finally doing pretty well at mastering physics after a few weeks of working with it,” says Bryne Judy. “But then once I saw hard mode I pretty much shit

a brick.” While bricks were being shat all over campus, Pearson has taken measures to correct the wrongdoing.

The textbook company is officially staying quiet over the matter, though insider information tells the Daily Bull that the programming for Hard mode came from a disgruntled laid-off employee, who was also a voodoo priest in the High-court of Beelzebub.

As of right now, Hard mode is steadily losing footing thanks to the emergency powers granted to elite IT professionals who are also high level clerics and paladins wielding holy USB drives, with each boot being another strike at the beast’s heart. Steve is now waiting on a decision on his pending expulsion for academic dishonesty and ex-communication from the Catholic Church for demon-summoning. ☹

pen if these wheels were to fall into the hands of terrorists? They could easily adapt these wheels to transporting catapults or other weapons of mass destruction. There’s no telling how many millions are being threatened by Iran’s wheel program.”

Historical records show that almost every country that has developed the wheel has gone on to invent tanks, flamethrowers, TNT, drag racers, or have invaded another country and practiced widespread genocide. This has led officials in a number of countries to voice their concerns over the intended direction of this new threat. Military history expert Alex Normand describes one such situation.

“We’ve all seen what happens when a not-so-friendly nation claims their new discoveries are in the name of bettering people’s lives and for peaceful purposes. Look at the North Koreans. One minute they’ve invented the trowel to help plant their rice paddies, and the next they’ve gone and stockpiled enough nerve gas to kill everybody in Japan. You’ve gotta nip these things in the bud before they get too advanced and start down that road. Wait too long and it might be too late.”

As a precautionary measure, the wheels were destroyed with Hellfire missiles launched from a pair of unmanned Predator Drones. The CIA then moved in and cleared any remaining evidence during a 45-minute bombardment from their Abrams tanks. 147 civilians were killed, a school destroyed, and 8 weddings disrupted, but according to official government statements, “was completely necessary to protect the freedom of people around the globe.” ☹

Knight House Gallants Defend Houghton

By Jon 'Big-O' Mahan ~ Daily Bull ~

AS MANY OF YOU ARE AWARE, THIS Monday there was an escaped convict on the loose in Houghton County. What you didn’t hear of was the valiant effort put up by the Valiants of Knight House to defend our campus from the engaging criminal. The story began on Monday afternoon, when John Walter Wilson escaped from being on work duty in Painesdale. From there authorities are unclear.

ately headed straight for the West Wadsworth Wing. This is where the opposition really rained down upon him.

10 seconds of which he could advance. It was not long before he was at the bursting through Wadsworth door, with free reign and access of the stairwells. He immediately sought his revenge.

Knight House’s own residents gathered up all the Nerf guns they could find and set up an ambush. At approximately 6:40 PM, the man showed up in the Wads back parking lot, after which the first shot was fired. A round from a long shot hit him squarely in the left arm. He looked around frantically thinking he’d been shot, when from the windows pointed many guns.

Therein lay his demise. The previous firing had been a trap, and as he entered the darkened hall of West Wads, 6 well placed shots hit him in the groin. Suddenly, someone from the orange kitchenette threw Sheila the Knight House boat maiden, used to keep them afloat during the cardboard boat race, straight into his crotch. Downed in pain, his chances of having progeny were now ended. With the leftover duct tape, the man was swiftly tied up. When the police arrived on the scene, they had only one thing to say: “Knight house, you have done a fine job.” ☹

Many speculations come into mind as to how he got from Painesdale to Houghton. It is speculated that he ran through the woods, wrestled a bear, killed a deer, ate a dog, molested a cat, and stole a small child from an Outland home. The child was later found where she attested that she was fine, after a nice man gave her some candy to use her GPS on her iPhone. Upon arriving at Houghton, he immedi-

He ducked behind a car as the Knights poured out their ammunition onto the criminal. Stopped in his tracks momentarily, he soon began to advance. Sadly, the Knights failed to remember to time their reloads, giving him a good
