Dr. Mundo Launches own News Channel

By Big O ~ Daily Bull

In a startling example of how otherworld politics and ideals can spill into ours, the affamed tank and damage sponge from the popular Multiplayer Online Battle Arena (MOBA) game League of Legends (LoL) has decided to launch his very own news channel, labeled BBC MUNDO. All Mundo, All the time.

Many were shocked to find out how easily he was able to take control and start a news organization. However, when asked how he did it, he very calmly noted: "Mundo run International Corporation as he pleases!" Truly it is an astonishing realization that an otherworld entity could start up such a large company so fast in our dimension.

This means a whole hosty of intersting conflicts and problems for us in our dimension. Could other heroes get through and arrive on our humble and small world? Could the forces of

We are back, and we want more fish.

By Kyle Roe ~ Daily Bull

The Dolphins have returned to Earth. All of humanity has been rejoicing and celebrating over the long awaited return of our fellow big brained species, the dolphins. For those that do not remember, in 1984 a famous writer Douglas Adams wrote "So long and thanks for all the fish" (Hitchhiker's Guide to the Galaxy) which was a completely nonfictional and accurate account as to

why and when the dolphins left Earth. They had all left because they realized that Earth would soon fall to its demise. However, it has been over 25 years now and Earth is still standing (floating). With Earth still here (unless we are just in some kind of Matrix, which is more likely) so the dolphins have finally returned, asking for more fish. Sadly they returned to find their normal habitats on Earth in a state less than what they hoped. Their precious (my precious) fish have been

nearly fished to extinction, and plastic trash islands of doom drift through their once home polluting the waters in its path.

The US Coast Guard asked MTU if their archery division could be housed on the campus, and MTU administration refused. This decision has angered many students.

group) the Obama Administration has come up with a near-perfect solution. The dolphins will be shipped to Lake Michigan to help our troops kill off the advancing Asian Carps. Ever since the carp infection has threatened the Great Lakes, the US Coast Guard has been enlisting members of the RFA (RedNeck Fishing Association) to help kill off the advancing fish. The dolphins could help increase the numbers on our side of the

... **DOLPHIN INVASIONS** from front. war. "By joining the Dolphin Armies with the RFA, we will be able to not only keep the returning Dolphins feed, but also tilt the scales in our direction in the battle against invasive species." said Gregg Nophin, our cross species relations ambassador.

Thousand of dolphins have been sent to Lake Michigan, and are forming up to help in the attacks against the carp. (Currently building barracks across the lake plains) To help the dolphins Michigan Tech and all the colleges of Michigan have been shipping teeth sharpeners, jets (to increase the dolphins speed) and head mounted lasers.

Michigan Tech Engineers have also been tasked with developing new weapons that the Dolphins can use to improve their attacking of the Asian Carp. Anyone who is interested in this or has any ideas for anti-carp weapons can visit www.stopasiancarp.com (this is an actual site). Currently, along with

the weapons given to the dolphin armies (now amounting to over 9000 dolphins) the harbors in Illinois have been fortified with a ton (that is an accurate measure) of defensive procedures. This includes: a super toxin that will release into all of the Lakes the moment a single carp crosses the laser tripwire, sea mines that detonate on the slightest touch, and a maze of defense towers created by a ten year old who plays a lot of Desktop Tower Defense. The US Coast Guard and the Dolphin Generals believe this should be enough to kill back the advancing Carp, however in case things get worse they have been talking with the president about deploying nuclear or bio/chemical based weapons to the Chicago harbors (to kill off the invading Asian Carp).

Writers Note: Fun fact I learned while researching for this article (yes I researched for this): There is a Calumet Harbor in Chicago, most likely a lost tribe of the Calumet people here. 🐾

lonia or Zaun or even, forbid, Noxus show up and conquer our world using their heroes as arbiters of destruction? Who truly knows. All that is known is that Mundo is here, and Mundo goes where he pleases - and right now, he pleases to stay.

On the bright side, BBC Mundo is here to stay it seems, and it is currently employing a large number of humans from our dimension to handle the workload imposed upon them. Mundo even calls each worker personally, to tell them that he needs them to come in on Saturday.

In other news, there are startling and conflicting reports of a gentlemanly bean galavanting about in Old London. He can be heard yelling at people to be quiet, as well as an occasional Pip Pip Cheerio and all that. 🐾
