OMG SPRING!

By Alec Hamer ~ Daily Bull

Looking out my window, I am greeted with the most beautiful sight of spring (at least here in Houghton)... blue sky! Oh, it is so glorious! It looks warm and inviting, but only one problem. It's cold as balls out there. Like really cold. I woke up Monday to a temperature of 15 degrees Fahrenheit. Is that really what the temperature should be on March 28th? Well, I believe this question is not for me to answer so I talked to Bill O'Reilly to help clue me in.

Q: Why is it with all this talk about global warming it still feels so cold?

A: Look, every year the seasons change. Temperatures cool down then warm up. Cool down then warm up. Never a miscommunication, how can this be explained?

Q: Well not that this has much to do with global warming but, isn't the earth on a fixed tilted axis which...

A: Look pinhead, I did not

UC's Top 5: Movie Monsters You Don't Want to #\$\$&%

By Matt "Undercover Minority" Villa ~ Daily Bull

It's been a while, loyal readership, but while I've been away I've been hard at work researching for this next top 5.

There are many movie monsters to choose from, but do to recent movies causing a select few to pop up as sex objects, I've decided to collect some reasons as why screwing them is a horrible idea. Let's start with our number 5.

#5 Vampires:

Okay, we are gonna start with Vampires, mostly because I really really want to get it over with. There are myriad reasons why relationships with these undead, bloodsucking visages of the night would end badly, but here are the main reasons you really don't want to fuck them. First of all, I subscribe to the classic description of vampires, in that their blood is turned to ash, and although they suck your blood, it is your life force they are

Nothing says love like rotting flesh, right?

draining from it, they are not replacing their own blood. Therefore, vampires have no blood, and (wait for it) can't get it up. That's right ladies, if you wanna fuck Edward, just know he isn't gonna be railing you anytime soon. But okay, let's humor you and say they vampires DO take your blood, and CAN get erections. In that case, they have been alive for a LONG time, sucking LOTS of people's blood, and since every vampire was turned by

yet another vampire, they've shared blood between them. If you think about it, they all probably have contracted an STD, or AIDS at some point, which means if you fuck a vampire, BOOM, STDs and AIDS are yours, and the only thing worse than AIDS, is vampire AIDS.

#4 Werewolves:

Seeing as we got

... **ORLY** from front agree to this interview to be undermined! So shut up!

that global warming can be credited to humanity.

Q: Sorry. What are your thoughts on the idea of anthropogenic global warming?

What? My hair? You can't explain that. How did it get there.

A: What the hell does history have to do with this? It's morons like you that make all these "scientists" seem less credible. Are you suggesting that global warming can be attributed to the activities of our ancestors? That is just insane....

Q: Anthropomorphic global warming is not the idea that global warming can be attributed to our ancestors; it is the idea

A: I guess you're right but every morning I turn on this box called a computer that tells me what to do in a message called an email. Every day there is a new one, telling me what to do. Never a miscommunication. Tell me how this could be?

Q: Fuck me. There is not anything mysterious or mystical about that! Read a book!

A: A book? Do you want me to be one of Satan's followers?

Q: FFFFFFFUUUUUUUUU!!!!!!!!!!!!!!!!!!!!!!

... **Bad Romance from front.** vampires out of the way, I might as well continue with werewolves. Again, I subscribe to classic lore, where the werewolf is a viscous man-hunter who has no shred of their humanity left (*cough* Kim Khardasian*cough*).

That means that if you want to shag a werewolf, you are gonna get ridden, and ridden hard, then shredded, then eaten. Now, I won't get into the mechanics of canine sexual reproduction, but to summarize, you do not want to be boned by a giant wolf, unless you are into that, which you shouldn't be.

#3 Zombies: This is an easy one, but for those of you who have ever felt the need to have an undead flesh eater lie gently next to you, lets summarize. Although their primal instincts include sex, they are much more interested in food, as in they will always want you to make them a sandwich instead of sex, except the sandwich is made of your brains. Also, since in order to have an erection, they would've had

to have died with one (blood no longer flows), and do you really want to screw the kind of someone who had a hard-on at the point of death? I think not.

#2 Frankenstein: This one is purely for your own health. He is made of other people, so you totally have no idea where his penis has been. Probably shouldn't risk the types of disease its previous owner had. Same reason applies to the Bride of Frankenstein.

#1 Godzilla: 10-story tall monster cock. 'Nuff said

Honorable Mention: The ROUS, he's a rat with a dick |-----this-----| big.
