By BIG O ~ DICTATOR v2.0

A US man who has received a full body transplant is making a success. The man was diagnosed with a terrible rare illness that robbed him of his entire body.

"It was literally disappearing before me. First my legs, then my arms, and eventually I was just a stump, and that began to disappear." Said the patient

Beginning to fear for his life, the patient sought a way to reverse the illness. The doctors only hope was to transplant him into another body.

So far the surgery has been a success. "Well, he's made a full recovery, and thought we are sorry for his circumstances and.... complications that have arisen, he doesn't seem too unhappy.

The World of the Wild Snow Cow

By Steve Whittaker ~ Daily Bull

Throughout the Keweenaw Peninsula of un-nutritious snacks and beverages the majestic snow cow is commonplace. Just how these creatures have come to populate the peninsula is still a mystery, but new research has shown signs of explaining the phenomenon. In this article we will explore the world of the snow cow and try to understand what it is like to live as one.

Hey there, buddy. Check out these hooves ;)

The snow cow dwells in a habitat not too different from our own. It is commonplace for them to live in apartments, houses, or dorm rooms. Typically they will have on a hand a healthy supply

of entertainment that doesn't require much physical effort on their part. This can range from video games to movies.

The average diet will consist mainly of unhealthy fried foods, sodas, Ho Hos, Twinkies, and Zebra cakes. It has even been known in rare occasions for a snow cow to dine on nothing but butter and mayonnaise. On a very rare occasion you may find one roaming a salad bar. However it should be noted that the salad will likely be

dire situation of the disease, the man's brain was transplanted into the body of a woman.

"It was certainly interesting my first time in it. I looked under my sheet and was like HOLY TITS! But they certainly have kept me entertained. My wife says she's going to need some more time getting used to it, but I think she'll warm up in no time!" Said the patient.

The surgery was funded by the US Navy in hopes that the techniques used could be used to help keep super soldier bodies on the front line. "If we can patch them up and let them go, that'd be best. Then we wont waste anyone!"

heavily covered in some sort of dressing, ranch is a popular choice. When it comes to mating, Snow Cows have been able to develop unique strategies. The popular one is the use of large quantities of alcohol. Many snow cows, and bulls for that matter, have resorted using quantities of alcohol ranging from Jack Daniels to KBC beer. After a threshold of alcohol has been consumed a snow cow may move in for the kill using phrases like, "My roommate has our room for the night and I have nowhere to go." Or seductively saying, "I'm sorry but I can't help but staring at the holes in your pants." (real quote) It is not uncommon for Snow Cows to migrate from other areas where a University is present, such as Marquette. Scientists are still baffled by the question of where Snow Cows originate, but recently thanks to new evidence and theories we may be approaching an answer. There are two schools of thought both explaining the mystery. The first is known as the MRS

Degree Theory. It is already know that Snow Cows will occasionally migrate temporarily to this area, but it wasn't until recently that we began to see why. Due to the nature of the local university and its overwhelming population of mates with high monetary potential, snow cows have a higher likelihood of attracting mate with good credentials. The second theory is known as the Cow Genesis Concept. It is built on the notion of snow bunny transformation. The concept hypothesizes that upon obtaining a mate many snow bunnies will lose interest in maintaining their appearance. It is said that the security of having a mate will cause the bunny to slowly transform themselves into a snow cow. The world of the snow cow is a fascinating one. Scientists will certainly keep studying these creatures to try and unlock their mysteries. Keep an eye out for next week when we look into the caverns of the Dormitories in search of the elusive CS major. 🐾
