BOTTLE APPEARED**

MTU Dining Harnesses Dorms as Ovens

Student Cooked Medium-Well

The first day of the Fall Semester at MTU took place under sweltering heat— a balmy 90 °F high, 86% humidity, and direct sun, without even the slightest tickle of wind to be felt to bring relief. Students sweated, water bottles condensated, and everyone took part in the annual tradition of cursing MTU campus for its lack of AC and air circulation. Large lecture halls like Fisher 135 saw the worst of the heat, but it was nothing compared to the heat felt in the upper floors of the dorms.

First year students were introduced to the basics of fluid thermodynamics with the lesson that heat rises, with the third floor of DHH particularly achieving withering temperatures. Opening the windows only made the problem worse, as it was still somehow warmer and more humid outside, and students were left with few options beside laying on the floor shirtless and enjoying the surprise sauna. Expeditions were sent to fetch ice from soda fountains in the dining hall, some not returning after succumbing to the heat along the way.

Where others were left wondering who had opened the door to the Fisher subbasement and unleashed the fires of Hades itself onto Houghton, MTU Dining Services saw opportunity. With McNair dining hall (or rather, "*The Eatery*") still closed for renovations despite advertising that they would be open in time for the semester, Dining Services saw a need for extra ovens and stoves. Rather than let good heat go to waste, cooks simply took trays of food upstairs in DHH and Wads, putting them in common spaces and dorm rooms to

cook via the all-natural, 100% organic heat of the sun. "It saves energy, it's in line with MTU sustainability initiatives, and it allows us enough capacity to continue serving undercooked poultry to the masses" one Dining Services manager remarked proudly in an interview, as chefs passed by carrying trays of what seemed to be fried chicken. When questioned about whether or not this cooking method was truly safe, the manager scoffed; "Safe? Of course it's safe. It's not like anyone is going to steal this food anyways. Every cooking tray we send up is 100% secure as it would be in any of our ovens."

With the upper floors of the dorms smelling faintly of spices, raw meat, s'mores donuts and sweat, MTU dining services were able to keep DHH dining hall open all day, rather than just for breakfast and lunch. However, with the heat subsiding on Tuesday due to rain, MTU dining was forced to go pull their oven operations back into the kitchens proper, instead moving the dishwashing outside to capitalize on the free water just falling from the sky.

Wild Bottle Looking for its Owner

DJ Benjamin

NOTICE: An unclaimed and random water bottle has been spotted on West campus, on a concrete platform next to the sidewalk between the AOB and Admin buildings. It is about 14 inches tall, in good condition, white, with a black screw-on cap, and a little sippy straw flip-up thing at the top. It has been in this location for about a week as of today.

Every day, students walk past the bottle and notice just how lonely, how sad, how *destitute* this water bottle is, sitting there by itself out in the pouring rain, yearning for its owner to come and reclaim it again. How could they just abandon it, it would think, if water bottles had the capacity to think. How could a perfectly good water bottle be totally abandoned so tragically? Especially when it's out in the open in a widely accessible area.

How long this water bottle could remain there is unknown. Most likely, someone will come by and throw it out within the next week, if someone doesn't claim it by then. This is a shame for a perfectly good water bottle, at least in appearance from the outside. It is wise to note, of course, that the contents within the bottle are completely unknown— it could simply be water, or there could be 30 ounces of distilled thioacetone sealed within. Only the owner knows at time present, as the bottle has remained completely undisturbed the entire time it's been there. So if you lost your water bottle circa a week ago and are wondering where it went, come rescue it so it doesn't look so depressing when everyone else walk past it every day.

Looking for things to add to your resume???

Wanna show employers your CREATIVITY????

Ever wanted to write "penis" in an MTU publication???

Do you enjoy funnys and hijinks?

Send in an article to bull@mtu.edu !!!!

Or check us out on Involvement LinkIIIIII
